Our financial team also includes specialists who are experts in evaluating new private businesses called start-ups, which have most chances to grow into large-scale and highly profitable enterprises. The idea is very simple: every business needs starting capital to go through bureaucratic formalities, rent premises, purchase equipment and other assets, hire employees and so on. As a rule, start-ups do not have sufficient funds to afford everything they need for effective activity. Banks are quite prudent to “newbies”, so it is often very difficult to borrow as much as necessary from banks.

GOLDEN FUTURE INVESTMENT platform intends to stay in business for a long time and do its best to ensure high revenue on investor’s deposits. The more money we collect, the higher the return. That

is why *GOLDEN FUTURE INVESTMENT* platform had started attracting small investments starting from only \$100. Our experts had examined and analysed the relevant investment markets and developed a highly efficient trading strategy. Investors can choose from a variety of investment packages to invest their funds for different periods and receive the best revenue at low risks. In recent years the investment industry, and in turn, investors have introduced a new gauge: *GOLDEN FUTURE INVESTMENT*– Environment, Social and

Governance – as a supplement to traditional financial gauges.

GOLDEN FUTURE INVESTMENT changes are happening faster than ever, reshaping how people live and invest. We believe that *GOLDEN FUTURE INVESTMENT* factors are going increasingly mainstream and can be used to drive investment outperformance.

Investing for a sustainable future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially from the issuance of ‘green bonds’.

While many in the fixed income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social and governance

The lounge features blue and white striped armchairs and a white circular table. The ceiling has several circular pendant lights with a glowing inner ring. The background shows a modern office interior with white walls and a wooden ceiling.

Sustainability practices, products and services drive revenues, profitability and competitive positioning

Our attitude to managing wealth is measured and insightful, with a consistent focus on preserving capital and delivering strong risk-adjusted returns.

Building a relationship of trust with our investors is important to us. Not only will we take the time to understand diverse financial requirements as well as investment objectives, we will also take the time to understand you. As an investor, you're always looking for opportunities. And as a firm we are, too. That's why as an innovative company we provide access to cryptocurrency spot contracts, as well as futures contracts, on a single platform.

GOLDEN FUTURE INVESTMENT strategies into their portfolios, a task rapidly growing in importance.

Why does it matter?

GOLDEN FUTURE INVESTMENT changes are happening faster than ever, reshaping how people live and invest. We believe that *GOLDEN FUTURE INVESTMENT* factors are going increasingly mainstream and can be used to drive investment outperformance.

Making the first step right is crucial to the long road of investments. Of the five steps, the first is to assess your risk tolerance and decide the most suitable asset allocation for yourself.

Different people have different attitudes towards investment. Some are not willing to take any risks or withstand losses, and therefore would rather forgo potentially higher returns. Some are willing to take some risks but tend to avoid huge volatility. Some are

willing to take risks in exchange for returns that outperform the markets.

How to gauge one's risk tolerance? Look at your investment horizon. Put it simply, the longer your investment life, the higher the risk you can take because you can afford the time to last a cycle, which helps smooth out short-term volatility. For instance, a young person just starts working, who is still far from retirement, can take more risk.

Sustainable investing

On the contrary, the shorter the investment period, the lower the risk one can take. Assuming you are going to retire next year, and not receiving any regular income, you just do not have the time to recover all losses if your investments take a nosedive all of a sudden.

Based on historical data, the same asset can perform drastically differently during different investment cycles. The best-performing asset in 2017 can turn out to be the worst laggard in 2018. That suggests no particular asset can be an all-time winner. Investors should therefore avoid putting all eggs in one basket but allocate assets across different sectors and geographies. That could help diversify the risk of an investment portfolio, and capture investment opportunities at different times for more stable returns in the medium- to long-term.

To make diversification works, an investment portfolio should include assets that are complementary, that tend to react differently to the same macro condition. More precisely, some negative

elements in the market might cause an asset to decline sharply, but pose little threats to another. In the world of investment, such pairs are called lowly correlated assets. They can effectively balance the risk and return of an investment portfolio.

Portfolio management

In the investing journey, investors should start by constructing a portfolio that accommodates their investment objectives and risk profiles. However, setting up the initial asset allocation is merely a starting point. It is equally important to regularly rebalance the portfolio to ensure the asset weightings are consistent. Overlooking the need to rebalance the portfolio can prevent investors from achieving their long-term investment goals. Market changes shift portfolio away from initial objective

In an investment portfolio, the relative weights of different asset classes may change due to market

fluctuations, which lead to a shifted asset allocation that deviates from the original target. In this case, rebalancing the portfolio will mean restoring the weightings of portfolio assets to the original designed levels. Hedge Funds and Private Equity the Company's investments in externally managed private equity funds and hedge funds, as well as private equity direct and co-investments.

The portfolio seeks to maximize risk-adjusted returns and diversify exposure by industry and geography, while giving the Company a global view of the alternative investment landscape.

With our archiving capacities and constant education of our staff, monitoring ever-changing regulations and global finance requirements, we are sure we can be a valuable ally in your expansion.

Investment Management

In 2015, the Company established the Investment Management division formerly known as Principal Investments and began its evolution into a leader in alternative investing. Investment Management leverages the Group's expertise, network, and financial strength to seek attractive

risk-adjusted investment opportunities across global markets and sectors.

Hit your investment targets with the right approach

Once you have identified your investment targets, you can put your cash into different asset classes and construct a portfolio based on your risk tolerance. The idea of asset allocation is to include equities, bonds and other investment tools in a basket. Since different investment vehicles come with different risk-return profiles, asset allocation is never easy.

Generally, the higher the potential return of an asset class, the higher the risks it carries.
